

Solve™ MCPA Ester

The water based herbicide specifically developed to mix easily with liquid fertilizers or hard water to control many hard to control annual and perennial broadleaves in Wheat, Oats, Barley, Rye, and Grasslands.

Solve™ MCPA Ester is the water based herbicide specifically developed to mix easily with liquid fertilizers or hard water to control many hard to control annual and perennial broadleaves.

Key Benefits of Solve™ MCPA Ester

- The Solve™ MCPA Ester water based, low odor formula contains no petroleum solvents and demonstrates your commitment to environmental stewardship.
- Solve™ MCPA Ester is specifically formulated to mix easily with liquid fertilizers including any UAN solution.
- Solve™ MCPA Ester goes into solution easily even in hard water.
- Solve™ MCPA Ester provides exceptional efficacy whether applied pre-emerge, post emerge or pre -harvest.
- The unique Solve™ MCPA Ester non-flammable formula does not require heated storage.
- Solve™ MCPA Ester can be applied using either air or ground equipment. As little as 3 gallons of water for air application and 5 gallons of water for ground application are required.

Use Rates for Wheat, Oats, Barley and Rye:

- Use ½ to 1 pint to control susceptible weeds depending on the growth stage of the grain
- Use up to 3 pints to control the less susceptible weeds after the crop has tillered
- Read and follow application directions on the label

Active Ingredients

2-Ethylhexyl ester of 2-methyl-4-chlorophenoxy-acetic acid	66.51%
Other Ingredients	33.49%

Total 100 %

Always read and follow label directions.

EPA Reg. No. 42750 – 25
AD020508

Solve™ MCPA Ester
