

Milo-Pro™

The propazine herbicide for Sorghum

Albaugh Inc. is cooperating with the National Sorghum Producers Association to bring back Milo-Pro™ the propazine herbicide sorghum growers consider the base of their weed control plans.

Proposed Labeled Crops

- Specific for Sorghum

Not offered for sale .

Registration pending at U.S. EPA

Key Benefits of Milo-Pro™

- Preplant applied so it protects the plant from early competition for water and nutrients in the crucial first four weeks of growth.
- Provides residual control of labeled weeds, especially Amaranthus pigweed.
- Highly effective control of troublesome broad-leaf weeds.
- Proven safe alternative on sandy and high PH soils.

Although Milo-Pro™ is not registered we believe it will be a Restricted Use Product.
