

# Triclopyr Rice

## Rice Herbicide

Triclopyr Rice is a postemergence systemic herbicide for the control of certain broad-leaf weeds in rice

### Key Benefits

- Flexible application at burndown, pre-flood and post flood
- Controls black-seeded broadleaf weeds
- Controls labeled weeds up to 24 inches and beyond when applied as directed
- Can be tank mixed with Arrosolo or a propanil herbicide to control additional troublesome weeds.
- Can be applied using either ground or air application equipment

| Weeds Controlled     | Application Rate     |
|----------------------|----------------------|
| Alligatorweed        | 1.0 pint/acre        |
| Common Cocklebur     | 0.67 - 1.0 pint/acre |
| Dayflower            | 1.0 pint/acre        |
| Eclipta              | 1.0 pint/acre        |
| Hemp sesbania        | 1.0 pint/acre        |
| Jointvetch species   | 0.67 - 1.0 pint/acre |
| Mexicanweed          | 1.0 pint/acre        |
| Morningglory species | 0.67 - 1.0 pint/acre |
| Redstem              | 1.0 pint/acre        |
| Rice flatsedge       | 1.0 pint/acre        |
| Ricefield bulrush    | 1.0 pint/acre        |
| Sicklepod            | 1.0 pint/acre        |
| Texasweed            | 1.0 pint/acre        |
| Water Hysopp         | 1.0 pint/acre        |

### Active Ingredients:

|                         |               |
|-------------------------|---------------|
| Triclopyr               | 44.4%         |
| Other Inert Ingredients | <u>55.6 %</u> |
| <b>Total</b>            | <b>100 %</b>  |

**Contains 3 pounds of triclopyr per gallon**

**Always read and follow label directions.**
